• Full traceability: IT System

Through a secure and dedicated Extranet, all our customers can easily access their files, related information and documentation, the status of their goods in our warehouses.

The system allows order tracking, automatically updated, allowing real-time traceability.

The screenshot shows the 'Operación de tráfico' (Traffic Operation) section of the Stock Logistic Extranet. A sidebar on the left contains navigation links: 'Area clientes', 'Operaciones de tráfico' (highlighted), 'Facturas', and 'Almacén'. The main area displays a table with columns: Shipper / C..., Ref. Embar..., Origen, ETD, Destino, ETA, and Situación. The table lists two shipping operations from CNSGH/Shanghai to DEHAM/Hamburg and TYHAM/Hamburg.

Shipper / C...	Ref. Embar...	Origen	ETD	Destino	ETA	Situación

The screenshot shows a detailed view of a shipping operation in the Stock Logistic Extranet. The top section displays a timeline of the operation, including 'Partida 1801540', 'Shipper / CNEE', 'Incoterm', 'Ref. Embarque', 'Tráfico', and 'Booking'. Below this, a table lists 'Contenedores' (Containers) with columns: Tipo, Cantidad, Descripción, Peso bruto (kg), and other details. The table shows two containers: one for 'PVC TUBES' and another for 'PVC TUBES'.

Tipo	Cantidad	Descripción	Peso bruto (kg)	Other details
20' DV	1	PVC TUBES	25.04	...
40' EV	1	PVC TUBES	24.04	...

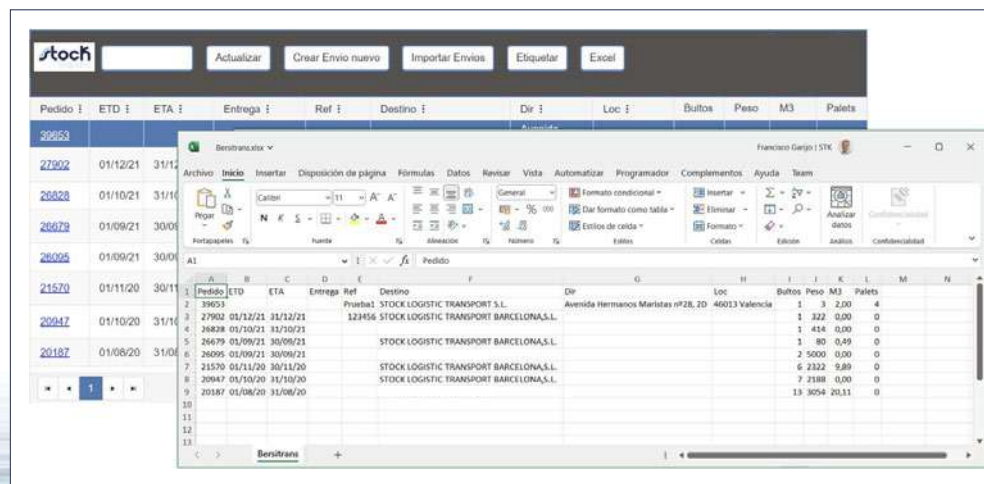

Our systems can send information to customers by mail according to their frequency preference. Documentation is always accessible.

Order creation is easy, customers who need it are provided with a system for autolabelling and tracking of their goods:

Customers can extract the information that affects them.

Integration is enabled through automated data input.
