

# Introducing new tools for network members

We are pleased to announce that WiseTech Global will be attending SCN Conference in Portugal from the 30th of April 2019 as our Exclusive Technology Partner.

WiseTech Global has been working with our networks to provide members with an integrated system - CargoWise One - which better equips you to compete on the global stage. We are excited to announce they will also be **introducing THREE NEW PRODUCTS** for members:

### Rate Management

Rates gives you the ability to autorate from a global database of carriers and rate providers without having to manually find and manage rates.

### Container Automation

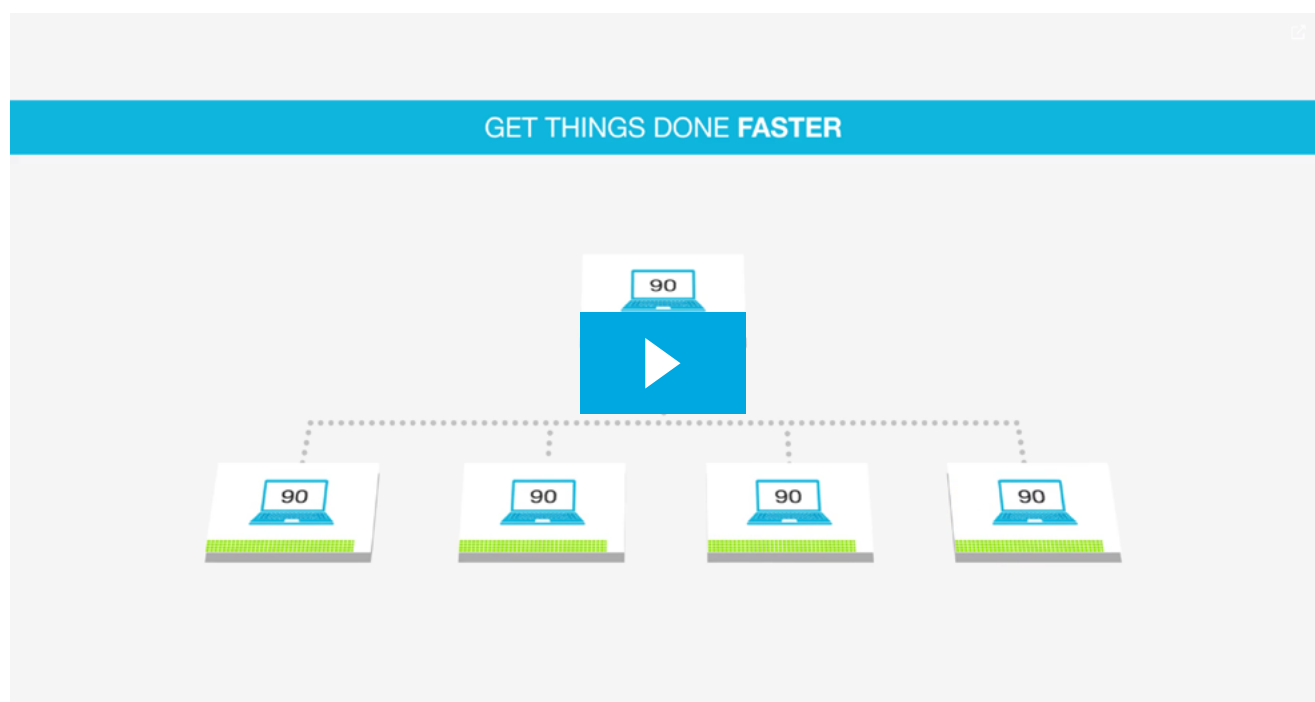

Container Automation allows you to automatically track ocean bookings, master bills, and containers so you can spend less time searching carrier sites, and more time delighting customers.

### Air Waybill (AWB) Automation

Members on CargoWise One can now follow the progress of registered AWBs, to manage exceptions, reduce fines and keep clients up-to-date with real world, valid tracking data.

These products are provided in addition to the services offered by WiseTech Global's platform, CargoWise One. See how fellow members are already using CargoWise One to integrate and share data:

Book a 1:1 meeting with WiseTech Global to learn more about these products and see how other members have adopted technology.
