

## Case study

# Intellog

### KEY TAKEAWAYS

**Problem** Costly, complicated international payments

**Our solution** Highly competitive exchange rates, expert support

**Benefits realised** Significant savings and trouble-free transfers

### Background

Intellog are a logistics and freight forwarding company offering full-service packages. They know everything there is to know about shipping by air, ocean, and road, in containers and through multimodal transportation. As their operations are international, so are their payments to partners.

### Challenges

The company used to use local banks to make their international payments but found the process costly and complicated. The Security Cargo Network introduced Intellog to Currencies Direct and they haven't looked back.

### Our solution

Intellog found it easy to create an account with Currencies Direct and were quickly up and running. They use us to convert EUR and make payments in USD and have noticed a significant reduction in costs as well as a decided improvement in payment efficiency.

“We decided to use Currencies Direct because of the competitive exchange rates they offered, the lack of SWIFT commission and the level of support they were able to provide. We've found the service trouble-free and the team are extremely helpful and prompt when we need anything. Communication is easy and we know they're there when we need them.”

*I would recommend Currencies Direct because they make overseas payments easy and can save you money compared to conventional bank solutions.* ”
