ACCURATE & COMPLIANT CO2 EMISSIONS TRACKING DATA

Greetings SCNers!

We´re excited to announce we are now offering "Accurate And Compliant CO2 Emissions Tracking Data".This feature will help our clients to better understand their carbon footprint, comply with new regulations, and make greener decisions.

>>> WE GOT THIS!

Tracking CO2 logistic emissions is becoming a top priority for businesses as regulations around the world will soon require companies to report them. We now provide our clients with accurate CO2 emissions calculations to better understand their carbon footprint, comply with new regulations, and make greener decisions.

>>> THE PATH TO A BETTER FUTURE

We truly believe this can also lead to cost savings and improved efficiency, making it a win-win for both companies and the environment. We also provide our clients with offset options through different projects around the world.

ACCURATE AND COMPLIANT CO2E DATA

- Easy to understand.
- GLEC Framework.
- Offsetting emissions (optional).

LOGISTIC EMISSIONS ARE 10% OF GLOBAL EMISSIONS
